Darren Ng Chi Weng

Forward Deployed Engineer | AI Systems | Full-Stack Engineering

+60 12-889 0318 | cwcw1056@gmail.com | linkedin.com/in/darren-ng-chi-weng | nimbusformastudio.com

PROFILE

Forward Deployed Engineer and AI-focused full-stack engineer with 3+ years of experience building and deploying production software, AI workflows, integrations, and internal business systems. Experienced across customer discovery, technical scoping, PRDs, system architecture, development, QA, stakeholder management, and live deployment. Comfortable taking ambiguous business problems from requirements through to practical, working technical solutions.

EXPERIENCE

Forward Deployed Engineer / Full-Stack Developer & Product Owner | AQREIGHT

Oct 2025 – Present | Full-Time · Hybrid · Kuala Selangor, Malaysia · AI Startup

- Own two client projects simultaneously as the primary developer, taking products from discovery and stakeholder approval through architecture, implementation, QA, and production deployment.
- Lead technical scoping sessions and write PRDs, translating business requirements into clear technical specifications, delivery plans, and implementation decisions.
- Design and implement agentic AI workflows and LLM integrations to automate repetitive work and improve client business operations.
- Act as product owner for company applications, leading internal R&D; and making architectural decisions across active products.
- Diagnose production issues and security vulnerabilities directly across client deployments, coordinating fixes from investigation through resolution.

Founder & Full-Stack Developer | Nimbus Forma Studio

Apr 2026 – Present | Self-Employed · Kuala Lumpur, Malaysia · Remote / Worldwide · SSM Registered

- Operate an independent software studio focused on AI systems, business automation, custom internal software, and technical advisory.
- Building Forge, an AI Business OS combining company knowledge, AI assistance, CRM, documents, workflows, analytics, and integrations.
- Develop reusable software products and AI workflow solutions intended for commercial delivery and productized services.
- Shipped Koji, a live local-first productivity OS with 40+ keyboard shortcuts, and developed Pulse, a public-beta health data dashboard.

Freelance Full-Stack Developer & AI Engineer | Self-Employed

May 2025 – Oct 2025 | Freelance · Remote · Career transition to AI-focused full-stack work

- Designed, built, and deployed full-stack websites and web applications using Vue.js, Tailwind CSS, .NET, REST APIs, and modern web platforms.
- Managed client engagements end-to-end across discovery, design, development, delivery, and post-launch support.
- Developed and integrated AI chatbots and LLM-powered tools into client workflows to reduce repetitive manual work.
- Delivered 88 Badminton House’s e-commerce and stock-management platform end-to-end, from architecture through live deployment.

EXPERIENCE

Junior Digital Developer | Trinergy Digital

Dec 2024 – Apr 2025 | Full-Time · Hybrid · Kuala Lumpur, Malaysia

- Contributed to an enterprise-grade internal operations platform for Pos Malaysia, focusing on scalable frontend architecture and backend integration.
- Built a reusable Vue.js and Tailwind CSS component library, improving development velocity and UI consistency.
- Developed and secured backend APIs in .NET and managed relational data queries and workflows through SQL Server.
- Participated in Agile delivery across standups, sprint planning, retrospectives, and team development workflows.

Junior Software Developer | Nax Group Sdn Bhd

May 2023 – Oct 2024 | Full-Time · On-Site · Selangor, Malaysia

- Engineered Puppeteer-based automation scripts for regression testing and QA pipeline optimisation on client-facing applications.
- Delivered documented Node.js solutions and contributed to code reviews and refactoring to reduce technical debt.
- Maintained and enhanced frontend features across multiple client products using HTML, CSS, and JavaScript.
- Sustained 95%+ client satisfaction through rapid bug resolution, proactive communication, and consistent production support.

SELECTED PROJECTS

Forge | AI Business OS

AI-powered internal business platform combining company knowledge, AI assistance, CRM, documents, workflows, analytics, and integrations.

Koji | Productivity OS

Live local-first productivity application with 40+ keyboard shortcuts and no cloud dependency.

Pulse | Health Data Dashboard

Public-beta dashboard designed to unify data from Apple Watch, Fitbit, and Garmin.
